SUMMARY OF EXPERIENCE

Combining proficiency in both frontend and backend development, I am enthusiastically pursuing an engaging position as a software developer. Rooted in a dual technical background, my goal is to leverage my adaptability, robust problem-solving prowess, and adept communication skills to drive innovation and produce outstanding software solutions. With a firm commitment to teamwork or working independently with collaboration skills, I aspire to utilize my comprehensive skill set as a full stack developer to contribute effectively to every phase of the development process.

SKILLS

- **Frontend Development:** React.Js | Next.Js | Redux | React Router | React Bootstrap | HTML | CSS | Tailwind CSS | Bootstrap | JavaScript.
- **Backend Development:** Node.Js | Express.Js | Java | ASP.NET | MySQL | MongoDB | SQL | NoSQL | PHP | PostgreSQL | MS SQL Server
- **Programming Languages:** JavaScript (ES6) | JavaScript | Java | C# | Python | PHP | C
- **APIs & Communication:** RESTful APIs | Socket.io
- **Version Control:** GIT VCS
- **Networking Skills:** Switch Port Security | OSPFv2 | Router on a Stick | VLAN (Many Switches) Configuration | Access Control lists | RIP | DHCP Management | Port forwarding | NATing

WORK EXPERIENCE

Full Stack Developer

August 2023 - Present

TDNT (Triplet Data Networks and Telecommunications LTD)

- Developing APIs to facilitate customer connectivity to our platform through various endpoints using Node.js.
- Designing and developing the frontend application utilizing React, its associated technologies, and Next.js
- Taking charge of testing all project-related features, ensuring robust and bug-free solutions.
- Developing backend applications and database management.

Operations Executive

July 2023 - Present

Cubic Connect

- Skillfully managing servers, supervising various social media channels
- Utilizing analytical insights
- Contributing to multiple software development mini projects, expanding my expertise and proficiency in the field

Warehouse Supervisor

July 2019 – October 2021

Perfume Commercial Center (Lattafa)

- Supervised and managed a team of workers in a warehouse or distribution center.
- Communicated with customers to understand their needs and ensure satisfaction.
- Ensured on-time delivery of products.
- Provided overall leadership and management for various warehouse operations.

EDUCATION

Bachelor of Science in Computer Engineering at Lebanese International University

June 2023

Main Courses: Data Structures and algorithms | Object Oriented and Functional Programming | Web Development | Mobile Applications Development | Software Applications and Design | Networking | Computer organization and architecture
